

BEHRINGERUSBAUDIODriver

April 26, 2017 - I am trying to install the Behringer USB audio driver on my Windows 7 Enterprise SP1 64-bit computer. but writes that it cannot start - code After restarting Windows and several attempts, I installed the driver. Now my microphone works fine, but my audio is still very quiet. This is my Creative SB X-Fi Xtreme HD Series sound card and I have older drivers. I have tried different drivers but to no avail. Any idea how I can get sound on the microphone? Update: I have tried the driver for 32-bit Windows systems and it works. So the issue is with Windows 7 64-bit.
