More Information Find more information at [www.photoshop.com](http://www.photoshop.com). \* \* \* # Mastering Lightroom Lightroom is a collection of programs that enables photographers to organize, edit, and share their digital images. Lightroom was initially developed for importing and organizing digital images. However, it has evolved to address the needs of photographers: full range of editing tools, including exposure and color correcting, and ability to enhance files for printing and outputting to disk or the Web. The Lightroom program exists as two product lines: Lightroom Classic and Lightroom 3. ## Lightroom Classic Lightroom Classic is included with your Photoshop CS6 purchase and is accessed from within the Photoshop program. The Lightroom Classic window shows you the top-level hierarchy of your digital images. Your Lightroom catalog is the home for all of the pictures you have shot with your digital camera. Depending on what camera you use, your images may be organized into a variety of different folders by date and time or into subfolders that contain specific types of pictures such as images captured with a telephoto lens or tripods. ## Lightroom 3 Lightroom 3, which is available as a separate program, shares the same hierarchy view with Lightroom Classic. However, it has a number of features that make it more powerful. These features include the following: \* \*\*Lightroom 3 has its own database of adjustments that can be applied to each image in your Lightroom catalog to make them look like the way you see them on your desktop monitor.\*\* You can add and delete adjustments, using any or all of Lightroom's features. \* \*\*Lightroom has a larger, better-organized, workspace containing the same tools and options that exist in the Lightroom Classic program, but with the addition of three-dimensional (3D) interactions.\*\* These interactions include: \* \*\*Look-up tables\*\* that allow you to mimic the effect of diffusing your light sources, producing an image that is more artistic than if you were using only a single light source. \* \*\*Corrective lenses\*\* , which enable you to take a picture of a lens to precisely match the performance of that lens (see Chapter 3). \* \*\*Lightroom Classic and Lightroom 3 share a common interface that allows users to instantly access images by selecting them from a star-field-like tree structure on the left side

[Genetic analysis of systemic lupus erythematosus in Family 1]. To study the genetic abnormality of systemic lupus erythematosus (SLE) in a Chinese family. The genetic data including the diagnosis of SLE of the proband and her family members and the medical records were retrospectively collected. The SLE patients were diagnosed according to the American College of Rheumatology (ACR) criteria. The genetic analysis was performed by direct sequencing of all the coding exons of the SLE-related genes. Genetic analysis of the proband and her family members revealed that her parents were I-1 and I-2, and her grandfather was II-2. The proband's mother I-1 and her grandfather II-2 who died from unknown reasons had history of SLE. The proband was diagnosed with SLE at the age of 20 and manifested as arthritis, discoid lupus, renal disorder, hemolytic anemia and leukopenia. The diagnosis of SLE was confirmed by her brother I-3. But neither HLA-B27 gene nor the DNA of cytomegalovirus (CMV), Epstein-Barr virus (EBV) and Helicobacter pylori (Hp) was positive. The family members of the proband had more than 1 system disease, such as I-1: SLE, II-2: SLE, III-1: SLE, III-2: SLE, II-3: SLE, III-3: SLE, III-4: SLE, III-6: SLE, I-2: SLE, and II-3: SLE. Genetic analysis of the proband and her family members revealed that SLE existed in the family. Her grandfather II-2 had SLE. SLE might have a genetic link with her family and be caused by her grandfather II-2's SLE. OMG, this looks amazing! Just opened my present and it looks so good I couldn't resist sharing. I love the idea behind this and obviously you could fit your whole kit and caboodle in there. Thank you, I really appreciate the thought. I think that the reward was well earned and I don't think I'll be doing that again any time soon. Hackey! P.S. an old roll of wrapping paper found its way in there,
