A: You are asking for a subtle ambiguity about the meaning of the expression. It can have several different senses, depending on context. The first sense is that of a boxing match, where you are trying to win. In the telephone example you've given, you are trying to win a battle, as follows: Talk to them, if they are not accepting your conditions, get the best of it However, it could be used in other senses: You are trying to get the best position on a deal, or the best position in an argument. Get the best of something is a similar way of saying you have to deal with that, you are in trouble, and you can do nothing to get out of it. Usually, people in the kind of culture where the expression is used will have a 'dexterous' feel for when a certain meaning is being played on you. However, you may not get a complete sense of the tone of the expression until you get to the end, when the chosen meaning becomes clear, and not just an interpretation. --- title: "json:SetCustomHeader" description: "" menu: riak_cs-1.4.0: name: "Set Custom Header" identifier: "custom_header" weight: 100 parent: "json" project: "riak_cs" project_version: "1.4.0" aliases: - /riak
