10/15/2007 Arrest Made In Alameda County Gang Shooting The Alameda County District Attorney's Office has made an arrest in a gang-related shooting on October 6th, 2007. Kimberly Williams was booked in Santa Rita Jail on suspicion of murder following a 36-hour manhunt. Williams, a member of the Barrio Rojos gang, is suspected of killing Robert Teeth, 19, whose body was found in the 13300 block of Morse Avenue on October 6th, 2007. Teeth was from Oakland and had been on probation since December 2006 for carjacking. The Alameda County Grand Jury has returned a no true bill on the carjacking case. Teeth's body was discovered by two joggers who were out running in the early morning hours, about a week after he was last seen. Teeth had gunshot wounds to his neck, chest and buttocks. He was wearing a dark blue hoodie and had been shot while sitting in a vehicle in front of his home. Police have arrested numerous men on gang-related charges, including at least three of the eight men that were in the car with Teeth when he was shot and killed. The sheriff's SWAT team and a Northern California search warrant team had been searching for Williams since early in the morning on October 6th, 2007. The effects of exercise on myocardial perfusion were studied in 20 patients with a clinical diagnosis of chest pain and suspected coronary artery disease (CAD). Rest 99mTc sestamibi scans and a supine bicycle stress test were performed and results were compared to coronary angiography. A total of 40% of the patients underwent angiography. Thirteen patients (65%) had coronary artery disease. The sensitivity, specificity and accuracy of a normal exercise scan to exclude CAD was 90%, 55% and 73% respectively. Exercise stress imaging using 99mTc sestamibi is a promising technique for the noninvasive diagnosis of CAD and can be employed clinically with confidence only in the absence of symptoms.Q: CardView Swipe appears for nothing and the view appears behind the back of the card I have a grid view and a card view but the card does not display at all. Recent Articles Introduction This year, the eighth anniversary of Bitcoin was celebrated in somewhat unconventional fashion: No major development took place in Bitcoin, and its price didn't even make a big dip. This was also the first year that the current version of the Bitcoin protocol, Bitcoin Cash (BCH), was launched. Bitcoin Cash forked away from Bitcoin in 2017 to create a new cryptocurrency BCH. The new currency had different rules and regulations, and it was not backed by any third-party institution. That was one of its main goals: to be a currency that was purely peer-to-peer. You can get BCH either by mining blocks or by following the "Bitcoin Cash" blockchain, which is what Bitcoin is. Thus, you can get BCH by trading Bitcoin for BCH, and this method is often referred to as "hodling". Since the forking, Bitcoin Cash has been a hot topic in the crypto community, as it is perceived to have more of the characteristics of a "proper" cryptocurrency and it would somehow bridge the gap between Bitcoin and the rest. According to its Wikipedia page, "Bitcoin Cash is a peer-to-peer version of digital currency and payment system Bitcoin. Like Bitcoin, Bitcoin Cash runs on a distributed peer-to-peer network and uses cryptographic proof of work to secure and verify transactions." So, the main differences of Bitcoin Cash are that it is perceived as a legitimate "next-gen" cryptocurrency and that it is backed by a company called "Bitcoin.com". Thus, the goal is that, by buying Bitcoin Cash, you are actually investing in the company. You get shares of Bitcoin.com as a bonus. Additionally, its network is much less centralized, compared to that of Bitcoin. That's why the currency is perceived as such an exciting idea, and why many are intrigued with Bitcoin Cash, as the blockchain of this currency is much more decentralized. That's why it seems like a more genuine cryptocurrency, especially when you pay with Bitcoin Cash. What does that all mean, in practice? Let's first take a look at the most important features of Bitcoin Cash, the differences to those of Bitcoin, and the pros and cons of these currencies, before we step into the first coin trading tips. Features of Bitcoin Cash Bitcoin Cash forked from the original Bitcoin in 2017, and that means
